Задача

ДЗ3: Тестирование API средствами Postman

Срок: 11.03.2026

Задание:

- реализовать тестирование API средствами Postman;
- написать тесты внутри Postman.

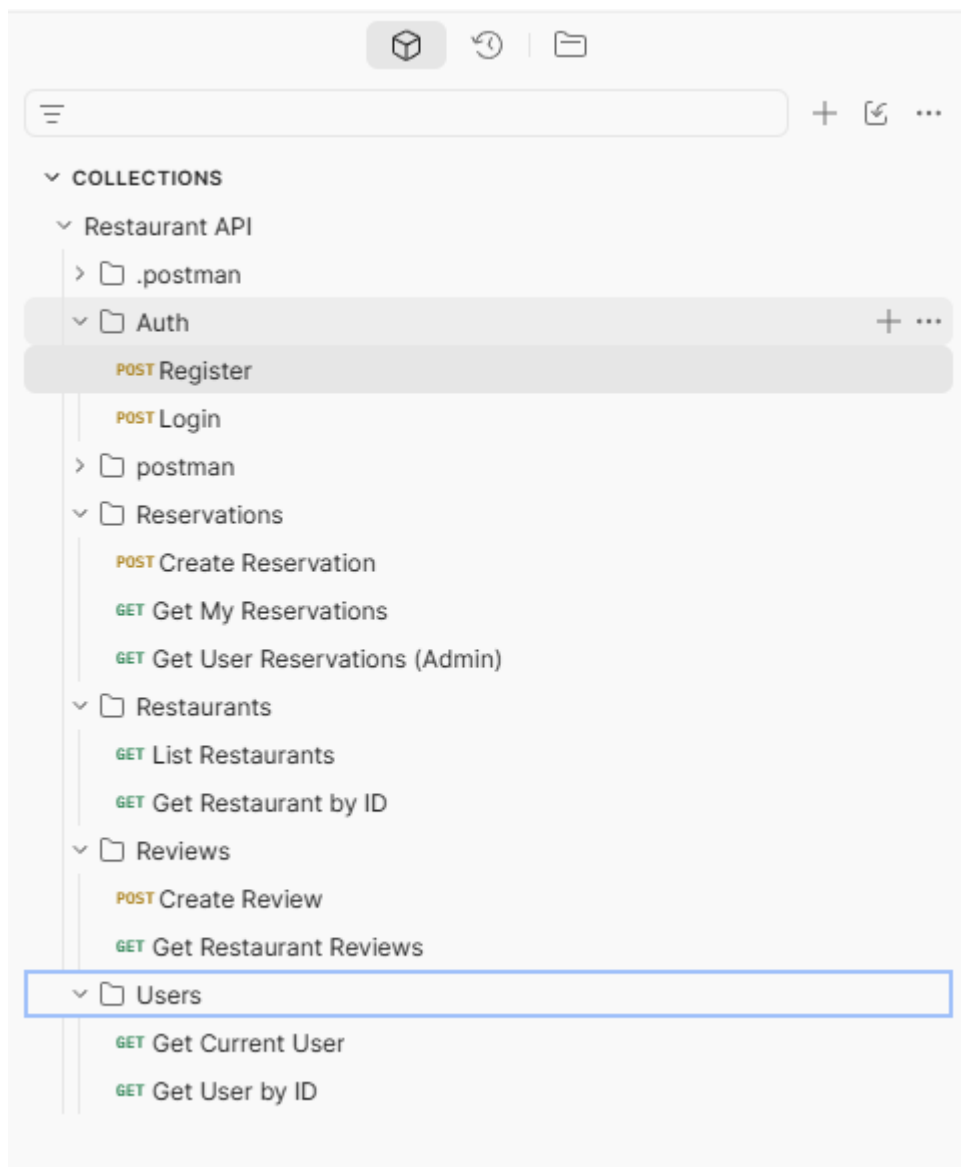

В результате хочу получить один комплексный сценарий по основному процессу в вашем приложении.

Пример такого сценарий для системы по аренде недвижимости: регистрация -> вход -> список объявлений -> фильтрация по списку -> просмотр случайного объявления из списка -> старт переписки по объявлению.

Необходимо сделать отчёт по [шаблону](#)

Ход работы

Я написал тесты на Postman, затрагивающие работу всех частей API
